

Logging in to Xamk Learn in a private window.

1. Open a private window in your browser. An icon for the private window remains visible at the top of the browser, so you can confirm you are in private mode.

In Edge, open the three-dot menu and select New InPrivate Window

In Chrome, use the Incognito button.

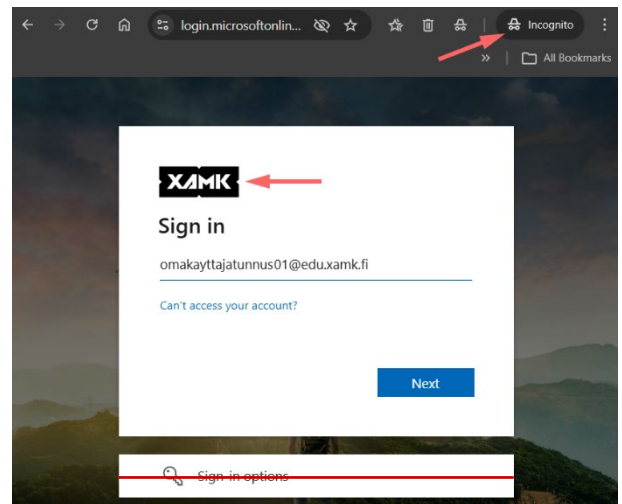

2. Go to <https://learn.xamk.fi> and click the XAMK login button or choose Log in → Login with Xamk credentials.

3. Enter your username in the field provided. A student username is entered in the format username@edu.xamk.fi. Press Next button.

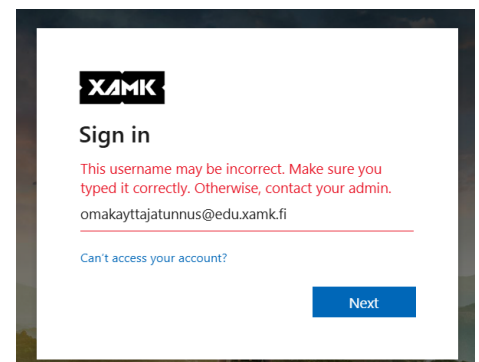

Check on the sign-in page that it shows the Xamk logo and that the browser is still in private mode.

Do not use any saved sign-in details that your browser may suggest, or any “Sign-in options” suggestions. Instead, type the username in the field provided.

If you get a notification that the username is incorrect, check that you have typed the username correctly.

You can check your username in Xamk's identification service at <https://id.xamk.fi>. The service uses Suomi.fi identification for sign-in.

4. Enter your password in the field provided and click Sign in. Do not use the alternative sign-in methods suggested at the bottom of the window.

Sign-in is confirmed using the multi-factor authentication method you have selected.

You can change your multi-factor authentication method in Xamk's identification service at <https://id.xamk.fi> by clicking the “Reset Mfa Identifier” button.
